

I love XM radio. It provides a variety of music, talk, and news programming that does not exist on "free" radio in the Twin Cities. It costs me \$17 a month (two radios) and is worth every cent.

If the NAB feels threatened by satellite radio, they should get to work and develop better radio programs, rather than shoving top-40, classic rock, and brain-dead djs down our ears year after year.

Please reject the NAB's petition 04-160, and let the best programming win!

Thank you,

Karen weium
